

Aquatic Solutions of MN
2020 Martha Lake Treatment Sign-up

- ☐ One (first) Treatment Program for Submerged Vegetation*
\$135 per treatment up to 50' shoreline (\$2.70 per shoreline feet beyond 50')
- ☐ Two Treatment Program for Submerged Vegetation*
\$135 per treatment up to 50' shoreline (\$2.70 per shoreline feet beyond 50')
- ☒ DNR Permit Fee
\$35 (non-refundable once the permit has been applied)

Instructions

1. Please fill out the form on the back and return by April 15th
2. Make sure to sign and date. Once we've received your application, the permit will be applied for using the DNR's online permitting website named MPARS.
3. No money is required until after the permit has been issued. An invoice will then be sent for the permit and the 1st treatment.

Timing

We plan on treating when the plants are up and growing. Please feel free to let us know what you are seeing. The estimated treatment date is shortly after June 1st for the 1st treatment and about 5 weeks later for the 2nd treatment. We will notify the lake association at least 1 day prior to treatment.

Results

There is no guarantee. Certain plants like wild celery, claspingleaf pondweed and chara are very difficult to control. Other plants, like coontail, and somewhat be controlled, but are non-rooted and may move over from non-treated areas. This treatment is strictly for submerged vegetation and algae.

Products used

Diquat (herbicide) and a copper based algaecide will be used at maximum label rates.

Restrictions

All restrictions will be posted prior to treatment. Generally there are no swimming or fishing restrictions.

*2nd treatment

If you do not want the 2nd application, you can cancel prior to the treatment. The main difference between Aquatic Solutions and other companies is we will NOT treat your area if no real benefit will be achieved due to difficult to control plants (mainly wild celery) in your area.

Application

The treatment may be applied by boat, by backpack, or a combination of both. Surface spraying or underwater injection will be used on a home-by-home basis. We will go out 100' from shore, or whatever the DNR allows.
